```java
public class Car{
private int yearModel;
private String make;
private int speed =0;
// 6 pts
public Car(int y, String m, int s){
yearModel = y;
make = m;
speed = s;
}
//6 pts
public String toString(){
    return make+yearModel+"(now ... at speed of "+speed+")";
}
// 5 pts
public void accelerate(){
    speed+=5;
}
// 5 pts
public void brake(){
    speed-=5;
    if(speed<0) speed =0;
}
// 7 pts
}
```
